

Waste Management Held on 22nd September 2017

A session on waste management was taken by CA Priyanka Garg, associate of NGO “Samarpan Dil Se Foundation”. Her focus was to guide the students that how they should implement proper waste management policy and to make them aware that successful and safe disposal of solid and liquid wastes are very necessary. In India, a proper waste management system is urgent necessary for the following reasons:

- To control different types of pollution, i.e., air pollution, soil pollution, water pollution etc
- To stop the spread of infectious diseases.;
- To conserve all our environmental resources, including forest, minerals water etc.;

Waste management is a burning problem in the urban, industrial and rural areas. Students participated in this discussion with full enthusiasm and also took initiative for the campaign “RALLY FOR RIVERS”.
